41st Annual Conference

August 5th - 8th, 2025

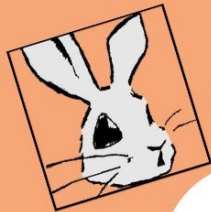

Groovin' With Mapping

Old Kinderhook Resort

Camdenton, MO

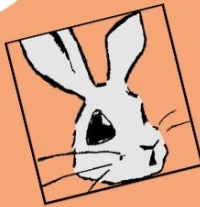

Your Citizens Have Questions.

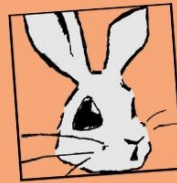

Is this address inside city limits?

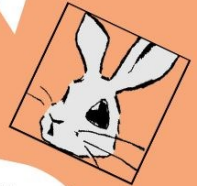

Where do I vote?

Can I build a drive-thru here?

Has my street been plowed?

Which ward am I in?

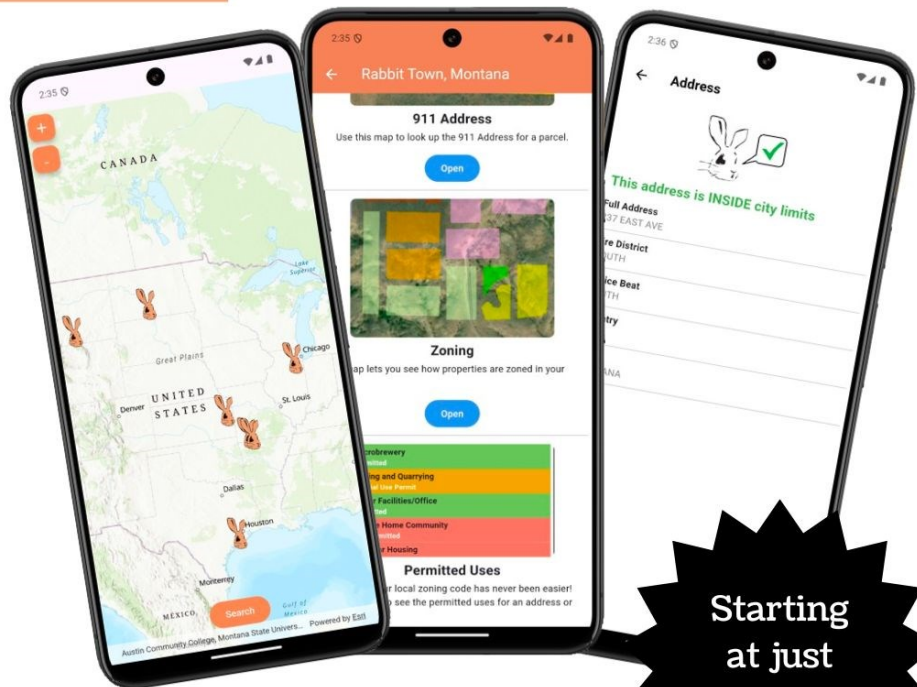

katalogmaps.com

Katalog Has Answers.

Introducing Katalog - the mobile and web app that makes it easier than ever for your citizens to get answers to their most common spatial questions.

Let's break it down. The citizen taps on a rabbit. They get a list of maps to browse. Feeling satisfied, they go about their day. Oh, and your staff ends up with less phone calls. Everyone wins.

And when everyone wins, we like to call that ***Just North of Magical.***

Starting at just \$195!

Aerial Mapping

Manned Aircraft

Our manned aircraft fleet is among the most advanced in digital mapping, equipped with state-of-the-art large- and medium-format sensors.

Unmanned Aircraft System (UAS)

We use an advanced fleet of drones, including multi-rotor and long endurance fixed wing UAS with RTK capabilities.

- Ground Control Surveys
- Aerial Acquisition, *imagery and lidar*
- Digital Orthoimagery
- Lidar Processing
- Planimetric and Topographic Mapping
- UAS Inspection
- Photogrammetry

Benefits

- Ability to provide all primary geospatial products: digital orthoimagery, lidar data and planimetric and topographic mapping products
- Highest possible quality products, adherence to schedule
- Topographic mapping and value-added lidar products that can address any project requirements
- Up-to-date equipment and software suite provides accurate and high-quality topographic modeling and planimetric mapping data
- GIS-ready digital orthoimagery and 3D mesh for use by assessors, fire/police and security
- Capture key benchmarks during construction

SEILER

GEOSPATIAL

GIS FIBER MAPPING

Seiler's GPS and GIS tools provide real-time fiber mapping, accurately documenting network infrastructure and integrating with existing GIS systems.

PROGRESS TRACKING

Dashboards help operators track fiber installation, monitor quantities, and generate reports, improving workflow and reducing delays.

FIELD DATA COLLECTION

Mobile apps and GPS devices ensure crews capture accurate as-built data, minimizing discrepancies between design and installation.

PUBLIC COMMUNICATION & COMPLIANCE

Seiler's GIS solutions provide interactive fiber maps for transparency and compliance.

ASSET MANAGEMENT

The Office Web Map enables easy editing, measuring, and exporting of fiber data for efficient maintenance and expansion.

TRAINING & SUPPORT

Seiler provides expert training on GIS tools and field applications, helping teams manage fiber networks with accuracy and efficiency.
